

Antique Rolling Ruler, English Cartographer's Instrument, Architect, Edwardian

DESCRIPTION

Our Stock # 25154

This is a fine antique cased rolling ruler. An English brass cartographer's or architect's instrument, dating to the Edwardian period, circa 1910. A superb example of precision engineering, this piece is ideal for collectors of scientific antiques and military survey equipment.

- Quality brass construction, displaying a light, desirable patina from decades of careful use

- Favoured by draughtsmen, cartographers, and architects for accurate line work

- Acrylic-lined edge for clear visibility and smooth alignment

- Glides effortlessly with a pair of finely machined brass rollers, ensuring precision across maps or plans

- Presented within a fitted satinwood carry case, offering rich grain interest and warm caramel hues

- Case engraved with the military broad arrow and Ordnance Survey serial number, adding historic and institutional provenance

- Tactile and practical form, ideal for display or continued use in specialist applications
