

## Antique Three-Draw Telescope, English, Walnut, Brass, Navigation, Georgian, 1790

### DESCRIPTION

Our Stock # 25424

This is an antique three-draw telescope. An English, walnut and brass navigational or astronomical instrument by Lincoln of London, dating to the Georgian period, circa 1790. Perfect for bird watching, landscape appreciation, wildlife, or maritime observation. Equally suitable for observing the night sky.

- A fine and tactile example of Georgian optical craftsmanship
- Crafted with a striking walnut main barrel, displaying warm amber tones
- Walnut exhibits a fine grain pattern, with minimal wear commensurate with gentle use
- Features three smoothly operating brass draw tubes, with bright golden hues
- Engraved to the rear barrel with 'Lincoln, London' – a noted maker of the period
- Fitted with a push-type dust cover to protect the 40mm primary objective lens
- Bright, functional optics with a clear image – suited for both display and gentle use
- A handsome piece for the collector of nautical antiques or scientific instruments
