

## Antique 2 Draw Telescope, English, Brass, Navigational Instrument, Victorian

## DESCRIPTION

Our Stock # 25469

This is an antique 2-draw telescope, an English terrestrial or maritime navigational instrument, dating to the late Victorian period, circa 1900.

Perfect for bird watching, landscape appreciation, wildlife, or maritime observation. Equally suitable for observing the night sky.

- A fine example of late 19th century British optical craftsmanship
- Constructed in brass, with a soft golden patina developed over time
- Primary barrel dressed in fruitwood, displaying rich russet tones and a refined grain structure
- Features two draw tubes that extend with a smooth, firm action
- Fitted with a swivel-type dust cover, protecting the eyepiece when closed
- Incorporates a large 40mm objective lens for bright and clear viewing
- Designed for both terrestrial and maritime observation, combining form and function
- Supplied with a London Fine oak and brass 'Captain's Stand' for display
