

Large Ammonite Specimen, Natural History, Jurassic Fossil, Antique Presentation

DESCRIPTION

Our Stock # 25611

This is a large antique ammonite specimen, African in origin and mounted during the late Victorian period, circa 1890. A magnificent example of natural history, set upon a fine mahogany plinth for distinguished display.

<li class="p1">Fascinating ammonite specimen, likely dating to the Jurassic or Cretaceous period

<li class="p1">Skilfully excavated and mounted in the late Victorian period, circa 1890

<li class="p1">Superb proportion with fossilised ridges and tactile spiral form

<li class="p1">Presented upon a quality mahogany plinth with display mount and rest

<li class="p1">Plinth displays fine grain interest and rich caramel hues

<li class="p1">Excellent presentation piece for natural history enthusiasts and collectors

<li class="p1">Ammonite alone weighs 25kg, with a total display weight of 28.2kg (62.17 lb)

This Victorian-mounted ammonite fossil is a striking statement piece, combining geological importance with decorative presence. A fine choice for display within a collector's cabinet, study, or museum setting. Delivered ready for the home or institution
