

Set of 3 Antique Biology Interest Books, English Scientific Reference, Victorian

DESCRIPTION

Our Stock # 18.9721

This is a set of 3 antique biology interest books. Published in English, each is a hard bound scientific reference title, dating to the late Victorian period.

Comprising of: Manual of Bacteriology by Edgar M. Crookshank (1890) - 460 pages; Bacteria & Their Products by German Sims Woodhead (1891) - 459 pages; and A Guide to the Microscopical Examination of Drinking Water by J.D. Macdonald (1883) - 199 pages.

- Presented in good, time-worn antique order - intact with some coloration throughout
- Each book hard bound in cotton with gold titling
- Fascinating illustrations accentuate the topics covered by each title
- Manual of Bacteriology features protective tissue over engraved plates

This is a comprehensive set of 3 antique biology interest books, with superb illustrations and coverage of the topic. Ideal for the collector or for those with a biological interest. Delivered ready to enjoy.
